SENIOR FRONT-END   SOFTWARE ENGINEER

More than 8+ years freelancing/Remote experience: Angular & React / Next.js / Node.js & AWS

"MY PRIMARY GOAL IS TO ADD VALUE"

I am Hmad, senior software engineer. **I always try to add value**. The question is **How?** Basically besides working on my tickets & bug fixing ... I try to optimize things, by following the best practices. for instance: make the front-end **loads faster**, be **Responsive** on **desktop & mobile**, use cache, memoization, indexes, compression, **Async code**, lazy loading and other best code practices.

EXPERIENCES

Cornerstone: (2023- present) Senior Front-end Developer (2 years)
- Angular 18 with NGXS & email templates (Node.js, PUG, AWS SES)
